HORIZON-CL6-2026-01-BIODIV-01: Understanding and tackling the decline of insects

Call: Call 01 - single stage (2026)

Specific conditions

Expected EU contribution per project	The Commission estimates that an EU contribution of around EUR 6.50 million would allow these outcomes to be addressed appropriately. Nonetheless, this does not preclude submission and selection of a proposal requesting different amounts.
Indicative budget	The total indicative budget for the topic is EUR 13.00 million.
Type of Action	Research and Innovation Actions

Expected Outcome:

Project results are expected to contribute to all of the following expected outcomes:

- researchers better understand the status and population trends of insect species and the drivers of their decline;
- competent authorities in charge of biodiversity policies at all levels are capable of taking informed decisions, based on better understanding and valuation of socioeconomic benefits and ecological importance of insects, including for climate action;
- society and relevant land managers are better informed and equipped to tackle the drivers of the decline of insects.

Scope: Insects play a vital role contributing to ecosystem functions in addition to pollination, such as decomposition and nutrient cycles, soil formation (including carbon sequestration) and pest control, control functions essential for maintaining ecosystem complexity, and are an indispensable part of the food chain. Those functions are key for climate change mitigation
